EXPERIENCE

NASA - Climate Game Intern

June 2024 - Aug. 2024

- Handpicked out of 600+ applicants due to my collaboration and game development skills with Unity, which allowed me to improve an upcoming large-scale, multiplayer turn-based strategy simulation game
- Collaborated with a team of 3 interns and NASA scientists, using Git for version control, to develop an educational game aimed at high school and college-level classrooms.
- Integrated scientific simulation equations for in-game resources, connecting equation elements using Python and C#, to enhance gameplay accuracy with real-life data.
- Enhanced server-to-client communication by restructuring backend WebSocket code in both C# and Python to ensure accurate scientific data transmission between the server and Unity client UIs

PROJECTS

Schedule Reader (Discord Bot) - Sole Developer | [GitHub](#)

July 2025 - Present

- Developing a Discord bot that uses Google Gemini AI to extract employee schedules from images, automating calendar updates from a single command, and saving over 2 hours each month compared to manual entry.
- Implementing image processing, asynchronous operations, and slash commands to create a responsive, user-friendly experience.
- Leveraging Discord.py to integrate with the Discord API, providing real-time feedback with dynamic loading indicators and error handling.

Market Dash (Web Video Game) - Game Developer | [GitHub](#)

Sept. 2024 - May 2025

- Led a team of five developers to design, build, and launch a browser-based game in nine months, applying agile development practices and version control with Git.
- Developed custom Unity editor tools in C# to streamline level creation, reducing design iteration time by 30%.
- Integrated gameplay feedback loops by collecting and analyzing playtester data, resulting in multiple feature improvements and enhanced user engagement.

Service Journal (Mobile App) - Sole App Developer | [GitHub](#)

May 2023 - Sept. 2023

- Developed a mobile app prototype for a landscaping business using TypeScript/JavaScript and Firebase authentication to streamline service tracking for clients.
- Gathered user feedback to tailor the app to specific business needs, prioritizing features for optimal user experience.
- Built a prototype with multi-stage forms for journal entries, utilizing ExpressJS, MySQL, and REST APIs for full-stack development, improving data entry and management efficiency.

SKILLS & CERTIFICATIONS

Programming: Java, C#, Python, JavaScript, Typescript, React, HTML, CSS, MySQL

Tools: Unity3D, VSCode, Git, Figma, Trello, Notion, Microsoft Office Suite, Google Workspace

CodePath Course Certifications: Android App Development (2022), CodePath Interview Prep (2022)

EDUCATION

Bloomfield College of Montclair State University

Bloomfield, NJ

Bachelor of Science in Computer Science & Game Programming

May 2025

LEADERSHIP

President | Games Club | Bloomfield College of Montclair State University

Sept. 2022 – May. 2025

Member | CodePath (Android Development, Interview Prep)

Sept. 2021 – Present
