EXPERIENCE

New Jersey Department of Community Affairs - Full-Stack Software Engineer

Feb. 2026 - Present

- Develop and ship production web applications using Next.js, TypeScript, Tailwind CSS, shadcn/ui, PostgreSQL, and AWS, owning features from implementation through deployment within a three-engineer team.
- Built full-stack features for an AI-assisted document retrieval system leveraging Retrieval-Augmented Generation (RAG), including role-based auth, admin approval workflows, document ingestion/chunking, OTP auth, and user-facing AI status handling.
- Contributed to the modernization of the New Jersey Eviction Guide and other constituent-facing applications, improving accessibility with axe, enhancing data collection, and supporting the migration from AWS App Runner to AWS Amplify.
- Collaborate using Linear, Git, peer code reviews, and automated AI-assisted PR review workflows while contributing to internal tools, including a department chat application piloted by roughly 10 users.

NASA - Climate Game Intern

June 2024 - Aug. 2024

- Handpicked out of 600+ applicants due to my collaboration and game development skills with Unity, which allowed me to improve an upcoming large-scale, multiplayer turn-based strategy simulation game
- Collaborated with a team of 3 interns and NASA scientists, using Git for version control, to develop an educational game aimed at high school and college-level classrooms.
- Integrated scientific simulation equations for in-game resources, connecting equation elements using Python and C#, to enhance gameplay accuracy with real-life data.
- Enhanced server-to-client communication by restructuring backend WebSocket code in both C# and Python to ensure accurate scientific data transmission between the server and Unity client UIs

PROJECTS

Schedule Reader (Discord Bot) - Sole Developer | [GitHub](#)

July 2025 - Oct. 2025

- Developing a Discord bot that uses Google Gemini AI to extract employee schedules from images, automating calendar updates from a single command, and saving over 2 hours each month compared to manual entry.
- Implementing image processing, asynchronous operations, and slash commands to create a responsive, user-friendly experience.
- Leveraging Discord.py to integrate with the Discord API, providing real-time feedback with dynamic loading indicators and error handling.

Service Journal (Mobile App) - Sole App Developer | [GitHub](#)

May 2023 - Sept. 2023

- Developed a mobile app prototype for a landscaping business using TypeScript/JavaScript and Firebase authentication to streamline service tracking for clients.
- Gathered user feedback to tailor the app to specific business needs, prioritizing features for optimal user experience.
- Built a prototype with multi-stage forms for journal entries, utilizing ExpressJS, MySQL, and REST APIs for full-stack development, improving data entry and management efficiency.

SKILLS & CERTIFICATIONS

Programming: TypeScript, JavaScript, Python, Java, C#, SQL, Next.js, React, HTML/CSS

Tools: AWS, PostgreSQL, Azure Database for PostgreSQL, Firebase, Node.js, Express.js, REST APIs, Tailwind CSS, shadcn/ui, Git, GitHub, Linear, Figma, axe, Claude, Unity3D

CodePath Course Certifications: Android App Development (2022), CodePath Interview Prep (2022)

EDUCATION

Bloomfield College of Montclair State University

Bachelor of Science in Computer Science & Game Programming

Bloomfield, NJ

May 2025
